Which features of [DVD packaging](#) do you consider to be the most important before deciding to purchase? The standard jewel box case is typical to a large number of DVD's when used for general purposes but something a little more luxurious may be required if the contents are for gift or display purposes. As well as the ability to produce large quantities of DVD packaging for the mass market there is also the opportunity to personalize or decorate cases if so required. Consumers will then have a unique and thoughtful gift for that special occasion packaged to the highest degree.
